

ABU BAKER SHAD

Full Stack Developer

 abubakershad.dev@gmail.com |  +92 321 4033991 |  Lahore, Pakistan
 abubakershad.vercel.app/_ | **GitHub:** @abubakershad | **LinkedIn:** @abu-baker-shad

Full Stack Developer with hands-on experience building **scalable, secure web applications** using JavaScript, MERN stack, and Next.js. Strong in responsive UI development, RESTful APIs, authentication systems, and database-driven backends. Focused on **performance, maintainable code, and accessibility**, with growing experience in AI-powered integrations and cloud-native technologies.

EXPERIENCE

Web Development Intern (MERN Stack)

Aug 2025 – Nov 2025

CodeAlpha

- Developed MERN stack applications with integrated RESTful APIs and frontend interfaces.
- Implemented authentication, protected routes & contributed to better architecture through collaboration.
- Optimized UI for performance, responsiveness, and cross-browser compatibility.
- Used version control and AI-assisted tools to streamline development and debugging.

EDUCATION

ADP Computer Science

Riphah International College, Lahore

2024 – 2026

F.Sc. (Pre-Engineering)

Unique Group of Institutes, Lahore

2021 – 2023

Matric (Computer Science)

Bise Lahore

2019 – 2021

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, HTML/CSS

Frontend: React.js, Next.js, Material UI, Chakra UI, Shaden UI, Tailwind CSS

Backend: Node.js, Express.js, RESTful API, Drizzle, NextAuth.js v5

Database: MongoDB, SQL, Firebase, Supabase

Tools & Platforms: VS Code, Cursor.ai, GitHub, Postman

Soft Skills: Detail-Oriented, Problem Solving, Debugging, Clean Code, Documentation, Team Collaboration

PROJECTS

Personal Portfolio:

- Developed a **feature-rich, full-stack portfolio using Next.js**, showcasing technical skills, key projects, and professional accomplishments through a polished, responsive, and user-focused interface.
- Implemented dynamic routing, reusable modular components, and SEO optimization for better visibility.
- Styled with Tailwind CSS and Shaden/ui for consistent, scalable, and responsive UI across devices.
- Deployed on Vercel with performance, accessibility, and best-practice optimizations.
- Focused on clean code, modular architecture, and maintainable full-stack design.

Age Calculator & Music Player Website:

- Built interactive, responsive web applications demonstrating strong JS fundamentals, DOM manipulation & state management.
- Developed a Music Player with functional playback controls, real-time updates, and dynamic playlist handling.
- Created an Age Calculator with dynamic user input validation and real-time result calculation.
- Optimized performance, usability, and responsiveness using pure HTML, CSS, JavaScript, & React where applicable.

AI-Enhanced Web Applications:

- Developed projects integrating AI APIs for automation, data processing, and intelligent user assistance.
- Applied prompt engineering techniques to optimize AI interactions and outputs within web applications.
- Explored practical **AI integration in full-stack projects**, bridging frontend interfaces with intelligent backend services to enhance automation, interactivity, functionality, and overall user experience.
- Leveraged AI tools to enhance development efficiency, debugging, & feature automation, preparing for modern AI-driven web ecosystems.
